## **DETAILED ACTION**

### ***Election/Restrictions***

In the Response to Restriction Requirement dated June 14, 2005, Applicant has elected the invention of Group I (Claims 1-11), drawn to a device, and Claims 12-22 are canceled without prejudice and disclaimer is acknowledged. Accordingly, Claims 1-11 are currently pending in this application.

### ***Allowable Subject Matter***

Claims 1-11 are allowed.

The following is an examiner's statement of reason for allowance:

Claims 1-8 are allowable over the prior art of record because the prior art of record does not teach or render obvious a structure of non-volatile memory comprises a plurality of selection gate (SG) lines formed over a first dielectric layer between bit lines, and a plurality of charge-storage structure layer, formed over a substrate between the bit lines and the SG lines, and in combination with all other features as recited in independent claim 1.

Claims 9-11 are allowable over the prior art of record because the prior art of record does not teach or render obvious a structure of a non-volatile memory unit with two-bit memory capacity comprises a selection gate structure line, disposed on a substrate between two doped lines, and a charged storage structure layer, located each side of the selection gate structure line between the doped lines and the selection gate line, and in combination with all other features as recited in independent claim 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
